September 2015

Semester One Facebook messenger conversations between team members

David Gutla 13/09/2015 18:50

Managed to finish the part 1 video of upskilling, doing the second video which i will post when the first is done. Overall, Swift is basically the same as Java with inheritance and all... the slight differences are the syntax. Would everyone be comfortable if i made a deadline this week to make your first app that is a simple temperature converter? It shouldn't take very long but you can definitely learn on the way! 😃

David Gutla 13/09/2015 18:52

The phases in the app should first include doing a 'local' no internet connection app, then we we later connect it to servers and such.

Kai Shao 13/09/2015 18:54

O . O got to go lab to do it 😦

David Gutla 20/09/2015 12:46

Need help with acceptance tests...

David Gutla 20/09/2015 13:37

I have all assigned you tasks, please check troll.

trello *

We have 12 user stories, i have written the first user story acceptance test as an example... your tasks are allocated.

David Gutla 20/09/2015 14:40

We will be having 4 tabs (Portrait only). Settings will be located at the bottom of the home page.

rough idea

David Gutla 28/09/2015 14:05

Hope the tutorials are going great! Since hit hub is up, let me know when you want the credentials so we can get started!

David Gutla 28/09/2015 14:15

Yay! online database is working with PARSE!

David Gutla 28/09/2015 14:20

David Gutla 24/09/2015 15:44

So everyone... We will be using PARSE as our database and back-end cloud service...

Kai Shao 24/09/2015 15:51

hmmm

It's gonna be tough for our team to do the ios programming. Although we can go lab to do it. But we won't be able to make progress without going lab.

David Gutla 24/09/2015 16:00

You can just use the VMware to install it on your laptops.

The Basement Theatre 4 people   + New Message ⚙ Q

okie

kai do you have the word doc?

of the proposal

Jozella Roque 28/09/2015 16:43

Congrats guys!! Our first A-

we did well, keep up the good work, next time lets get an A
😀

Kai Shao 28/09/2015 17:10

👍

Jozella Roque 28/09/2015 18:54

Are we having our meeting tomorrow or wednesay?

Write a reply...   ☺

Hey team! These are the notes I took in this afternoon's lecture:

Mid Review Evidence
Project Planning & Control Evidence can include:
• Gant Charts, meeting records, sprint schedules, multiple project plan versions.

Project Decision Rationale Evidence can include:
• Risk plan, research, proposal, product evaluations, why things were done

Team work and Communication:
• Team agreement, team role information, meeting records, client reports

Research and development activities/outputs:
• Prototypes, diagrams, requirements document, research questions, data collected, tech evaluations

Quality Assurance activities/outputs:
• Risk plan, change management plan, proposal ,status report, acceptance tests, templates, standards, guidelines
